

Note on DVD-RAM Driver (UDF Driver) Installation for DZ-MV580A/E, 550A/E, 380A/E, and 350A/E

When the DVD-RAM driver (UDF driver) bundled with DZ-MV580A/E, 550A/E, 380A/E, and 350A/E is to be installed on the following language version of Windows by clicking the Driver and Formatter Setup button in the DVD-RAM Software Setup screen, an error may occur. To work around this error, please install it by the following procedures.

Windows versions:

- Dutch
- Portuguese
- Danish
- Swedish
- Norwegian
- Finnish
- Chinese (Simplified)
- Chinese (Traditional)
- Korean

Work Around

Right-click the CD-ROM drive icon, and then click **Open**, and execute the **Setup.exe** in the following location in the CD-ROM bundled with your DVD CAM.

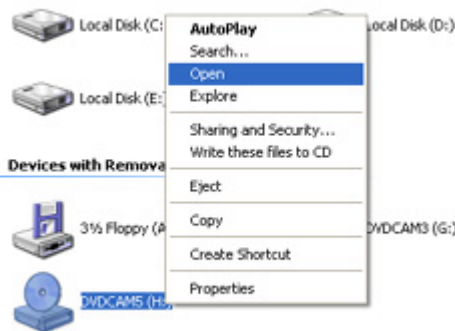

For Windows XP users: \ **UDF** \ **Driver** \ **WinXP** \ **English** \ **Setup.exe**

For Windows 2000 users: \ **UDF** \ **Driver** \ **Win2K** \ **English** \ **Setup.exe**

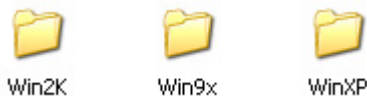

For Windows Me and 98 users: \ **UDF** \ **Driver** \ **Win9x** \ **English** \ **Setup.exe**

Step:

1. Insert the CD-ROM bundled with your DVD CAM into the CD-ROM drive, and then open My Computer.
2. Right-click the CD-ROM drive icon, and then click **Open**.

3. Double-click the **UDF** folder in the CD-ROM, and then double-click the **Driver** folder. The **Win2K**, **Win9x**, and **WinXP** folders are seen under the **Driver** folder.

4. Double-click the **Setup.exe** file in the following folder under the **Driver** folder.
You may see two **Setup** files with the blue and white icons depending on your file view settings. If so, double-click the one with the blue icon.

For Windows XP users: \ **WinXP** \ **English** \ **Setup.exe**

For Windows 2000 users: \ **Win2K** \ **English** \ **Setup.exe**

For Windows Me and 98 users: \ **Win9x** \ **English** \ **Setup.exe**
